

METHODS AND APPLICATIONS OF ANALYSIS

March 2014

Volume 21, Number 1

Special issue dedicated to the 70th birthday of Stanley Osher: Part II

Guest Editor: Chi-Wang Shu

CONTENTS

- i Dedication
- 001 **Free-stream Preserving Finite Difference Schemes on Curvilinear Meshes**
Yan Jiang, Chi-Wang Shu, and Mengping Zhang
- 031 **Fast Huygens Sweeping Methods for Schrödinger Equations in the Semi-Classical Regime**
Shingyu Leung, Jianliang Qian, and Susana Serna
- 067 **A Conservative Discontinuous Galerkin Method for the Degasperis–Procesi Equation**
Hailiang Liu, Yunqing Huang, and Nianyu Yi
- 091 **Automatic Correction of Image Intensity Non-uniformity by the Simplest Total Variation Model**
Ana Belén Petro, Catalina Sbert, and Jean-Michel Morel
- 105 **Augmented-Lagrangian Regularization of Matrix-Valued Maps**
Guy Rosman, Xue-Cheng Tai, Ron Kimmel, and Alfred M. Bruckstein
- 123 **Simulation of High Re Boundary Layer Flows Using Vorticity Confinement**
John Steinhoff, Subhashini Chitta, and Yonghu Wenren
- 151 **Simultaneous Data Recovery in Image and Transform Domains**
M. Tong, Y. Kim, L. Zhan, G. Sapiro, C. Lenglet, B. A. Mueller, P. M. Thompson, and L. A. Vese
