

PREFACE

This special issue of *Methods and Applications of Analysis* is dedicated to Professor Stephen Yau on the occasion of his sixtieth birthday. The issue consists of 14 papers which cover a wide spectrum of the methods and the applications of analysis to the areas that Professor Stephen Yau has worked in. These areas include CR Geometry, Complex Singularity Theory, Control theory and Mathematics Biology.

Guest Editors:

John Erik Fornæss, Norwegian University of Science and Technology;
Xiaojun Huang, Rutgers University;
Song-Ying Li, University of California, Irvine;
Yat Sun Poon, University of California, Riverside;
Wing Shing Wong, The Chinese University of Hong Kong;
Zhouping Xin, The Institute of Mathematical Sciences, CUHK.
