

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 20, Number 1

January 2013

Sara Arias-de-Reyna and Christian Kappen , <i>Abelian varieties over number fields, tame ramification and big Galois image</i>	1
Jungkai Chen, Meng Chen and Zhi Jiang , <i>On 6-canonical map of irregular threefolds of general type</i>	19
Xiaoyang Chen , <i>On the fundamental groups of compact Sasakian manifolds</i> .	27
Zhen Lei, Yi Du and Qingtian Zhang , <i>Singularities of solutions to compressible Euler equations with vacuum</i>	41
Wolfgang Ebeling and Atsushi Takahashi , <i>Variance of the exponents of orbifold Landau–Ginzburg models</i>	51
Thomas Barnet-Lamb, Toby Gee and David Geraghty , <i>Congruences between Hilbert modular forms: constructing ordinary lifts, II</i>	67
Lawrence Ein, Robert Lazarsfeld and Yusuf Mustopa , <i>Stability of syzygy bundles on an algebraic surface</i>	73
Ping Li , <i>An application of the rigidity of Dolbeault-type operators</i>	81
Kevin H. Lin and Daniel Pomerleano , <i>Global matrix factorizations</i>	91
Sergey Mozgovoy , <i>On the motivic Donaldson–Thomas invariants of quivers with potentials</i>	107
Laurent Amour, Mohamed Khodja and Jean Nourrigat , <i>The classical limit of the Heisenberg and time-dependent Hartree–Fock equations: The Wick symbol of the solution</i>	119
Chinmaya Gupta, William Ott and Andrei Török , <i>Memory loss for time-dependent piecewise expanding systems in higher dimension</i>	141
Paul Pollack , <i>The smallest inert prime in a cyclic number field of prime degree</i>	163
Stephen Tawn , <i>A presentation for the pure Hilden group</i>	181
