

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 20, Number 3

May 2013

---

<b>Laurent Berger</b> , <i>Multivariable Lubin–Tate <math>(\varphi, \Gamma)</math>-modules and filtered <math>\varphi</math>-modules</i> .....	409
<b>Bruce C. Berndt, Sun Kim and Alexandru Zaharescu</b> , <i>Dirichlet <math>L</math>-functions, elliptic curves, hypergeometric functions, and rational approximation with partial sums of power series</i> .....	429
<b>Barbara Brandolini, Francesco Chiacchio, Antoine Henrot and Cristina Trombetti</b> , <i>An optimal Poincaré–Wirtinger inequality in Gauss space</i> .....	449
<b>Simon Brendle</b> , <i>Alexandrov immersed minimal tori in <math>S^3</math></i> .....	459
<b>Hans Christianson, John A. Toth and Steve Zelditch</b> , <i>Quantum ergodic restriction for cauchy data: interior que and restricted que</i> .....	465
<b>Meng-Kiat Chuah</b> , <i>Double Vogan diagrams and irreducible pseudo-Hermitian symmetric spaces</i> .....	477
<b>David Helm</b> , <i>On the modified mod <math>p</math> local Langlands correspondence for <math>GL_2(\mathbb{Q}_\ell)</math></i> .....	489
<b>Zheng Huang, John Loftin and Marcello Lucia</b> , <i>Holomorphic cubic differentials and minimal Lagrangian surfaces in <math>\mathbb{C}H^2</math></i> .....	501
<b>D. Kotschick</b> , <i>Kählerian three-manifold groups</i> .....	521
<b>Diego Maldonado</b> , <i>The Monge–Ampère quasi-metric structure admits a Sobolev inequality</i> .....	527
<b>Anderson L. P. Porto and Pavel A. Zalesskii</b> , <i>Cyclic extensions of free pro-<math>p</math> groups and <math>p</math>-adic modules</i> .....	537
<b>Joseph H. Silverman and Bianca Viray</b> , <i>On a uniform bound for the number of exceptional linear subvarieties in the dynamical Mordell–Lang conjecture</i> .....	547
<b>Sandip Singh</b> , <i>Coxeter groups are not higher rank arithmetic groups</i> .....	567
<b>Gábor Székelyhidi</b> , <i>A remark on conical Kähler–Einstein metrics</i> .....	581
<b>Chaoqiang Tan</b> , <i>Boundedness of classical Calderón–Zygmund convolution operators on product hardy space</i> .....	591
